

NIKOM 65 Ltd is leading Bulgarian company in production of mechanical seals.

Our activities are based on a long experience of our specialists and covers wide range of unique and special spare parts. For this purpose we use our own machinery. We are in good business relationships with lot of Bulgarian institutes and research units regarding design, testing and applying in our production new materials, surface treatments etc.

Our main production contains of:

Mechanical seals for pumps and compressors.

PTFE lined pipes, flanges and fittings.

Sealing materials from expanded graphite. Spiral wound gaskets.

Main area of NIKOM 65 Ltd is production of mechanical seals, which are highly reliable rotary sealing systems used in almost all sealing applications. We can supply wide range of mechanical seals for extra ordinary temperatures, pressure and speed, which do not loose their efficiency in almost any operating fluid (clean water, fluid with hard impurities, corrosion, abrasive or explosive fluids, toxics, etc.)

High-tech surface treatments and dimensional restoration with SIFCO Process[®] - Selective plating technology (brush plating). Plating is done at room temperature, so no deformation of the part is obtained. We are able to apply following coatings - babbitt, nickel, cobalt, copper, etc. over carbon or stainless steel parts, hydraulic rods and cylinders, copper or aluminum parts etc.

Modern, powerful computer programs and computer-controlled benches are used for calculating and testing the design of the mechanical seals. Real operating conditions tests are processed for all produced mechanical seals.

We are supplier for the above mentioned parts and services for all major companies in Bulgaria - NPP Kozloduy, Lukoil Neftochim Burgas, thermal power plants of AES-3C Maritza East 1, Maritza East 2, Contourglobal Maritza East 3, mining industry companies Aurubis in Pirdop city and Dundee Precious Metals Chelopech, Sofia Med, other TPP in Bulgaria, chemical plants and hundreds of other clients across the country.

We have export for our clients in European Union, Middle East and countries from former Soviet Union.
